PROJECTS

Forest Magique

- [nextjs-webstore-three.vercel.app](#)
- Web store made with **Next.js**
- Integrated **Stripe** for seamless payment options, including instant and cart-based transactions.
 - Utilized **Sanity** for CMS content management, incorporating custom fields and efficiently fetching data with **GROQ**, demonstrating the ability to handle complex queries and dynamic content management.

Coin Search

- <https://tinyurl.com/2s3vtufj>
- React crypto market search application - frontend
- **Tailwind CSS** and **Daisy UI** for responsive design, and **Framer Motion** for engaging animations, and user interaction on a cryptocurrency market data platform.
 - Integrated **Chart.js** to visualize historical coin prices.
 - React functional components and state management, with a custom **useFetch** hook for data retrieval

Book Your Future

- <https://tinyurl.com/yc28has5>
- React** application for booking and managing events
- Worked in a collaborative **Agile** team environment on participating in daily stand-ups, weekly sprints, and retrospectives.
 - Used the **MUI library** to build responsive design.
 - **Redux Toolkit** for efficient state management, organizing complex application states.
 - **Node.js** and **MongoDB** for building the backend of the application.

Current Information

- <https://tinyurl.com/2wcj7xpm>
- Vanilla JS web app with multiple APIs - frontend
- **Vanilla JavaScript** web app demonstrating the potency of asynchronous code and various **APIs** to deliver personalized information based on user location.
 - Implemented a seamless flow of data retrieval and display, offering real-time updates.

SKILLS

HTML	CSS	JS	React	Redux
Tailwind	Framer Motion	NodeJS		
MySQL	MongoDB	Git	UI/UX	
Figma	TypeScript	Next.js		
Problem-Solving	Time Management			
Empathy	Attention to Detail
